THE OUTLET SEARCH

Take the idea of "work anywhere" to the next level. Create a charging table by incorporating the long-lasting EnerGEE! battery system into an Interior Concepts table. The EnerGEE! accessory allows any USB charged device, like phones or tablets, to remain charged for hours *without being connected to building power*. Wheel the table anywhere recharging is needed to create a wireless charging station. Forget about locating an outlet and leave the extension cord forever behind.

Outfit a classroom, training lab, testing room, conference room, warehouse, or office and allow multiple people to work all day anywhere before recharging the EnerGEE! unit overnight. EnerGEE! features a Lithium Iron Phosphate Battery, which is known for its safety, life, power, and environmental friendliness. The battery in the EnerGEE! unit will retain its capacity for 90% of its life-cycle, so it can be recharged thousands of times, ensuring charging capacity for years to come.

Adjustable-height tables add even more versatility.

NO OUTLET — NO DOWNTIME — FULLY CHARGES:

FEATURES

- Four USB 2.0 charging ports with water and spill resistant flush mounting in the table
- Fuel gauge to show charge status
- Lithium Iron Phosphate Battery
 - Known for its safety, life, power, and environmental friendliness
 - Charge 7–10 typical cell phones from empty *on one charge*
 - Charge 3–5 typical tablets from empty *on one charge*
 - Rated for thousands of recharges without losing capacity
 - Steep charging curve maintains 85–90% output until 90% discharged for maximum power over a longer discharge cycle
 - Features USB 2.0 charging technology compatible with fast charging devices
 - Automatic shut off to ensure battery does not get damaged
- Two charging options
 1. Plug unit into a traditional charger to recharge
 2. Simply push the table against our exclusive proximity conductive charging station to automatically recharge
- Cost effective
 - Add to any current Interior Concepts table with a 4-port Axil Z installation
 - Individually replaceable batteries when eventually needed
- Made in the USA

Easy-to-read fuel gauge with four USB 2.0 ports.

Battery mounts conveniently under the table.

Wall-mount conductive charging option.
