

Drop Ship Honeycomb Deluxe Pack Design

We start with a bottom corrugated tray which has two 1" honeycomb runners that go with the width of the cabinet.

Then we add four 15" honeycomb corner posts and 6" honeycomb front and back door posts for added protection.

Finally, there is a top corrugated tray. Cabinets that are 42" high and below also have the two 1" honeycomb runners in the top tray.

The cabinet is then put on an appropriate-sized pallet and strapped three times – twice in one direction and once in another direction. This helps to secure the cabinet on the pallet just in case one of the straps break.

ISTA Certified

Sandusky packaging meets and exceeds the standard the industry set for transportation.
