

# Balloon Math

Write the missing number that makes the balloon bigger.

 $4 \times \underline{\quad} = 40$ 

 $5 \times \underline{\quad} = 500$ 

 $9 \times \underline{\quad} = 9,000$ 

 $7 \times \underline{\quad} = 700,000$ 

 $30 \times \underline{\quad} = 30,000$ 

 $67 \times \underline{\quad} = 67,000$ 

 $422 \times \underline{\quad} = 4,220$ 

 $5,500 \times \underline{\quad} = 55,000$ 

 $65,700 \times \underline{\quad} = 6,570,000$ 

 $320,000 \times \underline{\quad} = 32,000,000$

## Brain Box

When **multiplying** a whole number by 10, put a zero at the end. When multiplying by 100, put two zeroes. When multiplying by 1,000, put three zeroes, and so on.

$76 \times 10 = 760$

$76 \times 100 = 7,600$

$76 \times 1,000 = 76,000$
